

Effective ventilation is an important way to create a more comfortable, healthier and energy efficient home. Removing the heat in summer, controlling moisture and encouraging fresh air into your home, will help you create a healthier and more comfortable living environment for your family.

KEY BENEFITS OF VENTILATION

Temperature control

Heat builds up in your roof space in summer, at times reaching 70°C. Edmonds roof ventilation removes the heat replacing it with cooler ambient air. This helps your insulation work more effectively and reduces the load on your air conditioning, particularly where there is ducting in the attic space.

Moisture control

Moisture in your home can be a destructive force, causing wood rot and encouraging mould and mildew, which can trigger asthma and allergies. Edmonds roof and sub-floor ventilators expel moist air helping to protect the integrity of your home and the health of your family.

Air quality

There's nothing like a breath of fresh air, but many homes aren't designed to allow fresh air to circulate easily. Edmonds roof vents, ceiling registers and air transfer systems all help to encourage fresh air into the areas of your home where it is most beneficial.

WHY EDMONDS?

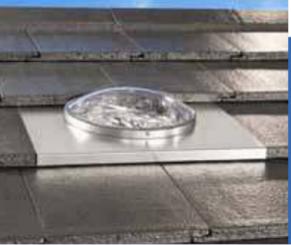

Edmonds has been the leader in home ventilation for over 75 years thanks to our commitment to continuing technical innovation. Our products are proudly developed and manufactured right here in Australia and exported all around the world. We are part of CSR, one of Australia's oldest and most respected companies with the resources to ensure we stay at the forefront of home air quality.

A breath of fresh air

Ventilation solutions for your home

SUB-FLOOR VENTILATION

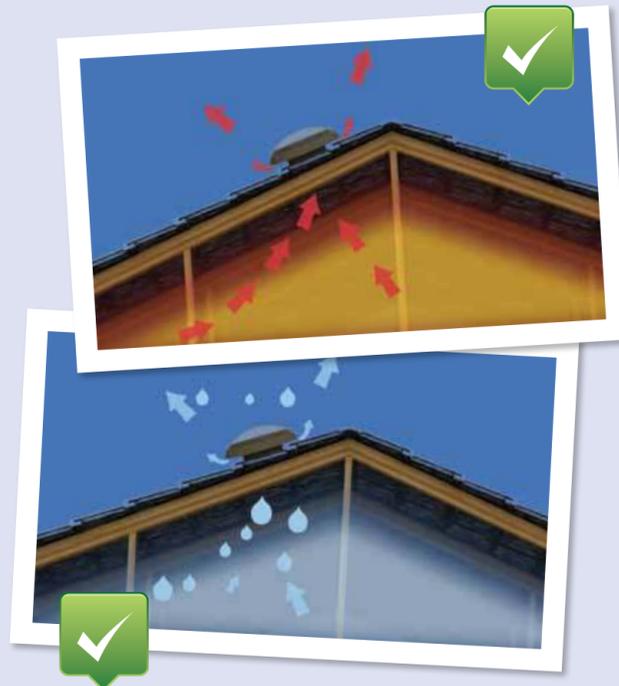

A damp sub-floor can be the perfect area for mould growth which can cause stale and musty odours to permeate into living areas. It can also lead to rot and provide an environment that encourages termite activity, threatening the structure of your home. Edmonds ecoFAN's high flow rate exhausts damp air from your subfloor helping to protect your family and your home.

ecoFAN Powered sub-floor ventilation		
	Features	Benefits
	<ul style="list-style-type: none"> Injection moulded UV stable polymer Attractive louvre design High efficiency DC motor Maximum flow rate 730m³/hr Three speed settings 2 year warranty (1 year powerpack) 	<ul style="list-style-type: none"> Highly effective removal of subfloor damp and odours Paintable to compliment your home Quiet operation Low running costs
